

# The Austrian Example

## How the old lady Will treat the wrinkles of Refugees in her face ?

### Terrorism... Hitler of 21 century !!

In 2016, I was get back to my home as usual from my work, I took a taxi, The driver was 19 years old as he told me, and because the traffic jam in the streets, we need subjects to talking about. The subject was, He had a girlfriend in Hay Aljama ( university neighborhood). The location of this region in Karkh in Baghdad. Exactly in the west of Baghdad, and she connected with Mansour city from the east, Hay Al kadrae ( Green neighborhood) from the west, Hay Al adal from the north, and Hay Al qudat (judges) from the south. The region had this name because the state distributed the lands in this region for the university professors. The young driver surprised me that he does not know how to reach this region!!

When you want to explain above, you will smell the perfume of sectarianism which turned the sons of one home land to ( I and the other). The sectarianism melting the human features, and the human became a creature. The refugees from the east to the west, always caused cautious reaction, until the European civilization found approaches, but the big question: Are you will adopt my values ? This question is so important in old continent, because The prominent them in Europe civilization, she merely on their own in education, philosophy, etc. That mean you will add to her but you cannot re- formed it. The book of ( Black culture industry) mentioned the opinion for authoress, shorten the relationship between the Black and White " we want what you have but we do not want you". I think this words had the right to become aphorism, Tell the Europeans, why some of the refugees felt they are suspended human being , but the refugees from the east must understand they are just 19 years in the measurements of urbanization in the old continent!!

#### Austria and the refugees

When we asked Martina blumauer, specialist in affairs of refugees assistant, about peoples from Iraq and Syria, how she found them, Her Answer was "well, what I know form them, they are very Respectable and nice, but I cannot differentiate between Iraq and Syria, because they are foreigners to me". Patrizia Holland, Teacher and activist ,whose gave a lot of her time to help the refugees, Refuse to put the refugees in one box " Honestly I can just talk about the people that I know. They are very polite and open for the European society". Holland told us the exact borders that the refugees reached in her brain " so I just have good experience till now ". Helga longin whose responsible on affairs of refugees in (bruck an der lietha), began " my straight

answer, People are people, like all people everywhere. Most of the people of Syria and Iraq educated, cultured, gentle, and almost all of them speak a foreign language ". Longin, turn the coin to said " I know they're people interestingly and polite, but we can't say this to all of them", and remembering us "People are like all people in the world".

#### Harassment and Islam phobia

The waves of refugees, hit harbors of Europe so strong. Surprisingly we heard the scream of harassment. The Middle east translated the scream as Islam phobia. Blumauer interpreted the scream "It is always the same, people are scared of foreigners, Because they really don't know them, So when more people came in, They are scared that something will be taken from them, That why it is going in this direction". Blumauer think also, The scream good as electoral projects for some politicians in Europe" Some politicians, intimidate the world by Refugees to reelections". Holland from her side, refused the religion explanations " from my point of view, It has nothing with religion or Islam". Holland gave the sexual instinct, The pressures of lower standards of life in the refugees camps, and gender the weight " it is difficult, it is such huge numbers of people, most of their times in very small camp ,and only men, so it is cost problems". Longin, run to the past century, To give us this information " First, Islam is independent and acceptable religion in Austria since 1911 ,There are many Muslims in the most cities of Austria". Longin analyzed, rejected as Holland the religion role " the second point, I do not think people are afraid of Islam, The most important thing to understand each other". Her addition was "Sometimes the problem is, Most of the new refugees don't speak German, This generates misunderstanding, And the general public are afraid of strangers". Longin, indicate also the role of the differences of thoughts related with political view " The third point that Europe had a free and liberal societies, And this is very important, And we are really proud of, So that, Men and women have the same rights, and the same possibilities". Longin indicated the fears " The thing that we do not like, The strong domination in Islam, Such as the Taliban or Daash whose want to build their own community, That which we do not like". Longin put the harassers, refugees and the Europeans in this equation " Those people frightening us, But in the opinion of most people who are here, They also afraid of this People, We really afraid of this, because no one has the right to harassment". The

final result that Longin reach it about the harassers " must be punished, thrown in jail, And if possible, send them to where they came from".

#### Austria as an example European message to the refugees

We knew that every nation had a tacit message to other nations, It is whispered for us, Where is the red line, And the white one. That what the speech, Europe- Austria felt so important with the refugees?

Blumauer paved her answer " I guess, Educate Refugees is not easy, And need time to do this, Even if people have a job and learn". Blumauer bring out from her conceptions basket this suggestion and its determinants " We must make them the same level of the European community, And this is hard historically, This will take a long time, Because we dialing with thousands people". Holland went to show us, That the speech still foggy " My country has no clear speech, Or clear point of view for the immigrants, I think it is just 30% of people who really behind the refugees, Probably too, There are 20% of the people have no opinion about that". Holland found the reasons of foggy attitude are "I think half of the Austrian people are Scared from the Situation, Because they don't know what is coming , They are Scared that the refugees, Will not be Intellectuals for the European society in our Actions and ethics. That will Creates other society next to ours, And that not good".

Longin felt she cannot talked with tenon of all Austrians " I cannot give an answer to a national, But I can answer for myself. I think the important thing to say, You are welcome here, But please respect our culture and our traditions, Conversely we respect your religion and your culture".

#### Refugees between citizenship and living as Moors

In 1609 A.D The Moors was fired from Spain. Here we does not want to talk about the reasons, But to refer that, Moors live like Jews, shared with them the horror of inquisition. Became Christian in words and Muslims in their hearts. Europe since the drummer of French revolution, Started to paved the way for citizenship in legislation terms, The message for different races (I Had many doubts about you, But you are my partner in the motherland). But how Europe, Austria as example will treat the refugees?

What is the plan to contain them? Are refugees a future Austrians or we must borrow some time to see what will happen? Blumauer criticized the Austrians politicians, She mark them unprepared for this big question (refugees)" I think , But I believe in the same time, that political work

is not good, Because they don't know how treat people, They are trying to send as much as possible of people to Germany". Blumauer exposed the felling of the refugees that she worked with them "A lot of people, Are not happy with this, But some people decided to stay here". Blumauer return to her primary analysis with additional plate of causes " I do not think they have a clear plan, Because they know that will happen long time ago, But they are not affected by this, They think that the refugees did not stay in Austria. When there was a lot of refugees stay here, They have to decide control of the situation, And I think they are trying to treat the refugees as Austrians". Holland, went quite the contrary from Blumauer " I am afraid that Austria plan, Is keep them as Refugees, And try to send them back home, If it is Possible". The reason of reasons for her prediction " Because if I look to the Political Plans now, They shorten the asylum period. It was five years, Now become three years, And they discuss one year at the moment". Holland put in our hand, The argument of the politicians to send the refugees back " Because there are many save Countries, People can go to them".

Holland coloring the argument of politicians, Indicating the cultural varieties " Not all of the people, will Adapting the European society values. That is my point of view" . Holland wishes for refugees was "I wish it is not, And we will see what happens in the future". Longin opinion, compound the point of view of Holland " I'm scared that Austria does not have a clear plan, So far". After that say good bay to Holland " I think we have to treat all refugees as Austrians. This would be the best way to integrate them into society, live together, And we do not know what will happen". Longin driven us to think there is a telepathic between her and Holland, because this paragraph " Probably some of them back to their homelands, And some of them will stay here all his life. So it is better to treat them as people from Austria".

#### The stomach of Austria cannot afford huge numbers

The numbers of refugees that Europe can afford, Become a matter of sharp controversial.

Austria tried to show us her limits. As usual we open the book with the help of Blumauer " I think they can afford a lot more, But To teach them, Educate them... teach them the German language is very difficult, So I think that, This process much more difficult to accept a lot of people". Blumauer may be found she need more space to showing us the effectiveness of the cultural gap, Between the refugees and the standards of her country citizens, That she shorten her space... talked in numbers language " We are had nineteen thousands. The numbers good, But I think, We can afford more".

Holland, mentioned the same number that Blumauer referred to it ( we think it is the official number), About the capacity of her country to afford from refugees, But in spite of this, She multiplying the number five times "I think we already reach this number in the moment . We have (19.000) thousands refugees in the country right now. Probably, We can afford (100.000) thousands more, But we reach our Limits now". Holland found (19.000) thousands so good, why... let us read "Because if you have more people in the country now, You have to care about Living Requirements, Such as health and other matters". Holland heat up the view " If you look at the fact, Refugees assigned to the state, Such as retired people in Austria, Who pay taxes all of their lives, So you can see how it is expensive the crisis of Refugees for the country". Longin refused to talked in numbers language, Preferred general frame " I cannot tell you about this specific number, It depended on what the numbers that we want to get". Longin add " the numbers of how many people we want to integrate into society. In the copyright of some cases there will be an end". Longin seen her country become the cosmic land of refugees " because all the refugees in the world come to Austria".

#### Money old temptation... terrorism the new version

The terrorism like money!! no one can escape from the temptation of talking about both, At least. We trying to see what is the effect that, The refugees came from countries infected with terrorism. Syria and Iraq specifically. The upset tone, dominated

on Blumauer at first " I don't care from where is the Terrorism". She excluded her country from falling in claw of terrorism beast " I do not think that, Austria big target of terrorism, because we are not intervening in this things". The delicious targets for this beast, as Blumauer thing " If there was a targets, I think it will be Germany and France". Blumauer closed the door with these words " Who cares where the terrorism are coming. If it exists, We will take care of him".

Holland, Expressed her fears without any diplomatic makeup " Yes, I'm afraid yes. This is the case". Holland hold herself after that to offer on us her level of understanding " All the complexity of every war, creates monsters". Holland hint, The terrorism is Hitler of 21 century in Austrian eyes " Especially here in Austria, If we remembered of WWII and Mr. Hitler, I think every person in Austria should have known what to do in the war". The prominent Feature of the war in Holland conception " War get out the worst from themselves". The final stand for Holland, taken from hope a shelter " But if it come to help people, maybe it bring the best of them".

Longin rejected to answer.

#### Conclusion

Who worked in political fields knew that, The domestic policy are the guidance of the foreign policy (the prestigious Democracies). The refugees will be a test for Europe, Because the old lady, Had a habitual stand in the international policy, she leaved the Big matters for her big partner... America. Refugees are a big case for Europe, because her conscious had been consumed in Holocaust (Palestine & Israel entity) . She tried to throw the burden through the solution of two states. But we think the Refugees, because they are now from flesh and blood not just media Ideal, There will be progress . Hope the smell of reality will make the matters easier for the human being, And we also confirm that if Europe success in Refugee exam, The dawn of new age will shine.
